

Locating ServerLink serial number and activation

Locate the admin tool on your desktop:

Double-click it then click on the license tile.

You can now see the Serial Number:

The screenshot shows the 'SERVERLINK - Administration Console - 7.10.1.11' window. The interface has a purple header bar with the SERVERLINK logo and navigation tabs for 'Server', 'Applications', 'Web', 'Security', 'Gateway', and 'License'. The 'License' tab is selected. On the left, there are two main sections: 'License Status' and 'Computer'. The 'License Status' section lists several features with green checkmarks: System Edition, Printer Edition, Web Access Edition, Secure Web Edition, Mobile Edition, and Corporate Edition. The 'Computer' section displays system information: Computer name (SERVER1 - 192.168.73.1), Connections (0/3), Serial Number (P64 E53 008, which is circled in red), License Activated (Corporate Edition), and End of support date (19 Dec 2014). On the right side of the console, there are two orange buttons: 'Activate your License' (with a key icon) and 'Uninstall Product' (with a red 'X' icon).

Just click on activate!
