

Updating ServerLink

It can be a good idea to apply an Update Release once in a while, to be sure that you get the latest ServerLink programs.

The download link is: http://ServerLink.com.my/Free_Trial

If you have users connected when you want to apply the Update, we recommend you to rename these 3 programs located in "C:\Program Files\SERVERLINK\UserDesktop\files":

- logonsession.exe
- srvterminal.exe
- runapplication.exe

Then, execute the Update Release program, a reboot is not requested.
