

# AdminTool: HTML5 Settings

## Overview

The tile "HTML5 Settings" is located in the "Web" tab of the AdminTool.

It allows you to customize the features available when using the HTML5 client to connect to your ServerLink server:

The **menu bar** and the **Ctrl+Alt+Del button** can be shown:

- on all devices (phones, tablets, computers)
- only on mobile devices (phones and tablets)
- not at all (i.e. it will be hidden)

The **File Transfer** feature can be enabled or not, according to your needs.
